

Purpose

This document provides you with key information about this investment product. It is not marketing material. The information is required by law to help you understand the nature, risks, costs, potential gains and losses of this product and to help you compare it with other products.

Product

Product name	5-Year Quanto Autocallable Certificate linked to the MSCI Japan ESG Leaders Decrement 5% Index
Product identifier	ISIN: XS2890037034 Valor: 137786031
Product manufacturer	Goldman Sachs International, part of The Goldman Sachs Group, Inc. (see http://www.gspriips.eu or call +442070510101 for more information)
Competent Authority	Hungarian National Bank (MNB) is responsible for supervising Goldman Sachs International in relation to this Key Information Document.
Date of this document	September 19, 2024 8:54:51 Budapest local time

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

- Type** The product is in the form of a certificate issued under English law. It is not an interest bearing security. The payment obligations of the product manufacturer are not guaranteed by any entity.
- Term** The product has a fixed term and will be due on November 13, 2029, subject to an early redemption.
- Objectives** The product provides the potential for capital growth and does not pay interest. What you will receive at the end of the term of the product is not certain and will depend on the performance of the index MSCI Japan ESG Leaders Decrement 5% Index (the **underlying asset**). The term of the product will end no later than November 13, 2029. However, the product may terminate early depending on the performance of the underlying asset. Each certificate has a face value of HUF 100,000. The issue price is 100.00% of the face value. The product is not listed on an exchange. The subscription period is from October 14, 2024 to November 6, 2024. The issue date is November 13, 2024.
 The return of this product is determined by reference to the performance of a modified underlying, which is calculated by reinvesting all net dividends paid by the underlying component(s) and subtracting a Pre-Defined Decrement. If the actual dividends paid by the underlying component(s) are lower than the Pre-Defined Decrement, the modified performance of the underlying asset will be penalized compared to the traditional "price return" performance. Conversely, if the actual dividends paid by the underlying component(s) are higher than the Pre-Defined Decrement, the modified performance of the underlying asset will be improved compared to the traditional "price return" performance.
Pre-Defined Decrement: The Pre-Defined Decrement for the underlying asset is shown in the table below. The Pre-Defined Decrement is expressed per annum and is detached on a daily basis.

<i>Underlying asset</i>	<i>Pre-Defined Decrement</i>
MSCI Japan ESG Leaders Decrement 5% Index	5.00%

Autocall feature: If the closing price of the underlying asset on any autocall observation date is at or above the autocall barrier, the product will terminate on the corresponding autocall payment date. In this case, you will receive an autocall payment for each certificate that you hold. Autocall observation dates are each trading day rolling semi-annually from November 6, 2025 (inclusive) to May 6, 2029 (inclusive). Autocall payment dates are dates falling 5 business days after each autocall observation date. Autocall barrier for the first autocall observation date is 100.00% of the initial reference price and will subsequently decrease by 1.00% of the initial reference price with each autocall observation date. Autocall payment for the first autocall payment date is HUF 110,000.00 and will subsequently increase by HUF 5,000.00 with each autocall payment date.

Repayment at maturity:

This section applies only if no autocall occurs as described above.

On November 13, 2029, for each certificate that you hold:

- If the closing price of the underlying asset on November 6, 2029 is at least equal to 92.00% of the initial reference price, you will receive HUF 150,000.00; or
- Otherwise*, you will receive HUF 100,000.00;

The initial reference price of the underlying asset is the closing price on November 6, 2024.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the product issuer may terminate the product early. These events are specified in the product terms and principally relate to the underlying asset, the product and the product manufacturer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

Intended retail investor The product is intended to be offered to retail investors who:

- have the ability to make an informed investment decision through sufficient knowledge and understanding of the product and its specific risks and rewards, with experience of investing in and/or holding a number of similar products providing a similar market exposure;

2. seek capital growth, expect the movement in the underlying asset to perform in a way that generates a favourable return, have an investment horizon of the recommended holding period specified below and understand that the product may terminate early;
3. accept the risk that the issuer could fail to pay or perform its obligations under the product but otherwise are not able to bear any loss of their investment;
4. are willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below; and
5. are making use of professional advice.

What are the risks and what could I get in return?

Risk indicator

The risk indicator assumes you keep the product until November 13, 2029. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early. You may have to pay significant extra costs to cash in early.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class. This takes into account two elements: (1) the market risk - that the potential losses for future performance are rated at a medium-low level; and (2) the credit risk - that poor market conditions are deemed very unlikely to impact our capacity to pay you.

You are entitled to receive back at least 100.00% of the face value of the product. Any amount over this, and any additional return, depends on future market performance and is uncertain. However, this protection against future market performance will not apply if you cash in before November 13, 2029. If we are not able to pay you what is owed, you could lose your entire investment.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		Until the product is called or matures	
		This may be different in each scenario and is indicated in the table	
Example investment:		HUF 3,200,000.00	
Scenarios		If you exit after 1 year	If you exit at call or maturity
Minimum	HUF 3,200,000. The return is only guaranteed if you hold the product to early call or maturity. You could lose some or all of your investment.		
Stress	What you might get back after costs	HUF 2,529,565	HUF 3,200,000
(product ends after 5 years)	Average return each year	-21.0%	0.0%
Unfavourable	What you might get back after costs	HUF 2,668,352	HUF 3,200,000
(product ends after 5 years)	Average return each year	-16.6%	0.0%
Moderate	What you might get back after costs	HUF 3,203,152	HUF 3,520,000
(product ends after 1 year)	Average return each year	0.1%	10.0%
Favourable	What you might get back after costs	HUF 3,203,152	HUF 4,000,000
(product ends after 2 years and 6 months)	Average return each year	0.1%	9.4%

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes that have been calculated based on simulations using the past performance of the underlying asset over a period of up to 5 years. In the case of an early redemption, it has been assumed that no reinvestment has occurred. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be easily cashed in. If you exit the investment earlier than the recommended holding period you do not have a guarantee and you may have to pay extra costs.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What happens if Goldman Sachs International is unable to pay out?

The product is not covered by an investor protection or guarantee scheme. This means that if we become insolvent you may suffer a total loss of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different investment periods.

The duration of this product is uncertain as it may terminate at different times depending on how the market evolves. The amounts shown here consider two different scenarios (early call and maturity). In case you decide to exit before the product ends, exit costs may apply in addition to the amounts shown here.

We have assumed:

- HUF 3,200,000.00 is invested
- a performance of the product that is consistent with each holding period shown.

	<i>If the product is called at the first possible date, on November 13, 2025</i>	<i>If the product reaches maturity</i>
Total costs	HUF 114,560	HUF 114,560
Annual cost impact*	4.1% each year	0.8% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at maturity your average return per year is projected to be 9.2% before costs and 8.4% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	3.6% of the amount you pay when entering this investment. These costs are already included in the price you pay.	HUF 114,560
Exit costs	2.5% of your investment before it is paid out to you. These costs are already included in the price you receive and are only incurred if you exit before maturity. If an early redemption occurs or if you hold the product until maturity, no exit costs will be incurred.	HUF 80,000

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The recommended holding period for the product is 5 years as the product is designed to be held until maturity; however the product may terminate early due to an autocal or an extraordinary event. You have no contractual right to terminate the product prior to maturity.

The manufacturer is under no obligation to make a secondary market in the product, but may repurchase the product prior to maturity on a case-by-case basis. In such circumstances, the price quoted will reflect a bid-ask spread and any costs associated with unwinding the hedging arrangements of the manufacturer in connection with the product. In addition, the person who sold you the product may charge you brokerage fees when you sell the product.

How can I complain?

Any complaint regarding the person advising on or selling the product (such as your intermediary) can be submitted directly to that person. Complaints about the product and/or the conduct of the product manufacturer may be lodged in accordance with the steps set out at <http://www.gspriips.eu>. Complaints may also be addressed in writing to Goldman Sachs International, PRIIP KID - Compliance Securities, Plumtree Court, 25 Shoe Lane, London, EC4A 4AU, United Kingdom or may be sent by email to gs-eq-priip-kid-compliance@gs.com.

Other relevant information

Any additional documentation in relation to the product, in particular, the issuance programme documentation, any supplements thereto and the product terms are available free of charge from the product manufacturer upon request. Where the product is issued pursuant to the EU Prospectus Regulation (Regulation (EU) 2017/1129, as amended) or the UK Prospectus Regulation (Regulation (EU) 2017/1129 as it forms part of UK domestic law by virtue of the European Union (Withdrawal) Act 2018 and regulations made thereunder, as amended), as applicable, such documentation will also be available as described on <http://www.gspriips.eu>.
